Visualization Tool for Electric Vehicle Charge and Range Analysis

1. Introduction

Electric Vehicles (EVs) are becoming popular because they reduce pollution and dependency on fossil fuels. This project analyzes EV data using Tableau to create interactive dashboards and stories. The dashboards provide insights into EV brands, models, charging stations, and price comparisons. The visualizations are integrated into a Flask web application so users can access them through a web interface.

2. Problem Statement

The rapid growth of Electric Vehicles has created a need for better analysis of EV brands, models, charging stations, and price variations. This project aims to collect EV data and visualize it in an interactive dashboard so users can easily understand trends and insights.

3. Objectives

• Collect EV data from available datasets.

• Clean and prepare the dataset for analysis.

• Create dashboards and stories using Tableau.

• Integrate the dashboard into a Flask-based web interface.

4. Tools and Technologies Used

• Tableau – Data visualization

• Python – Programming language

• Flask – Web framework

• HTML/CSS – Frontend interface

5. Data Collection

The dataset contains information about EV brands, models, price ranges, body types, and charging station regions.

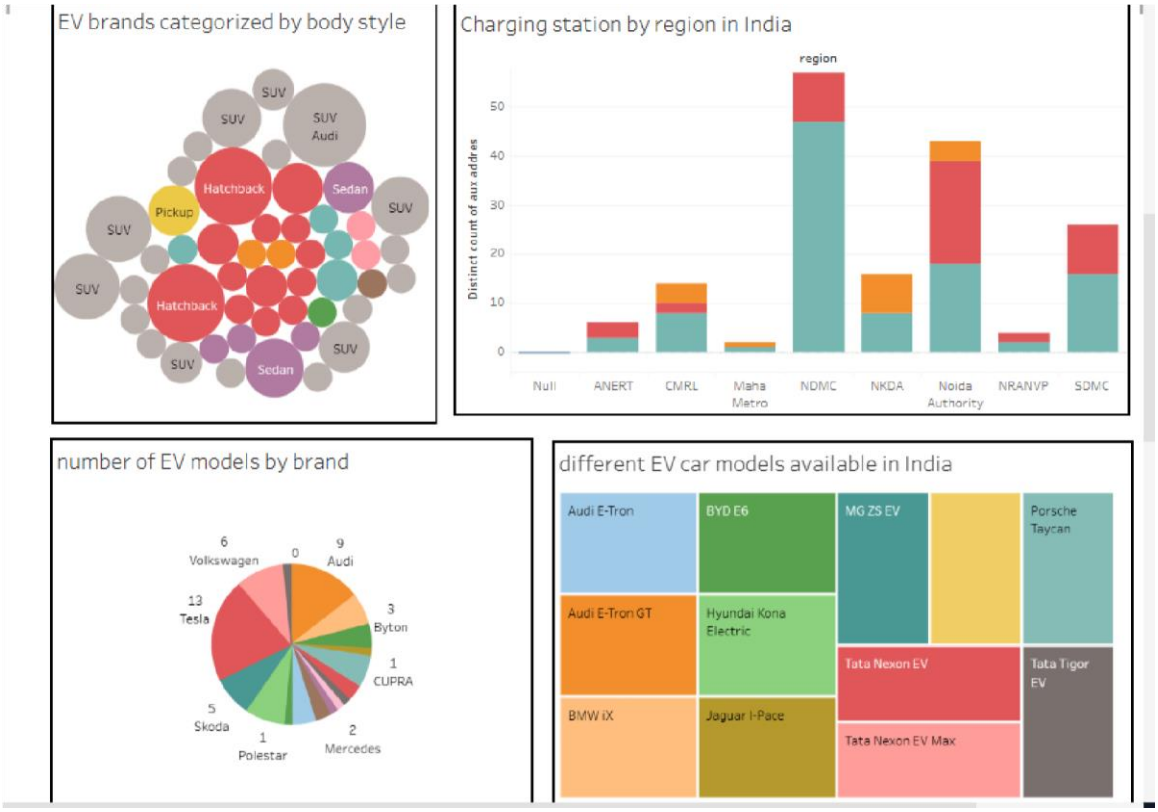
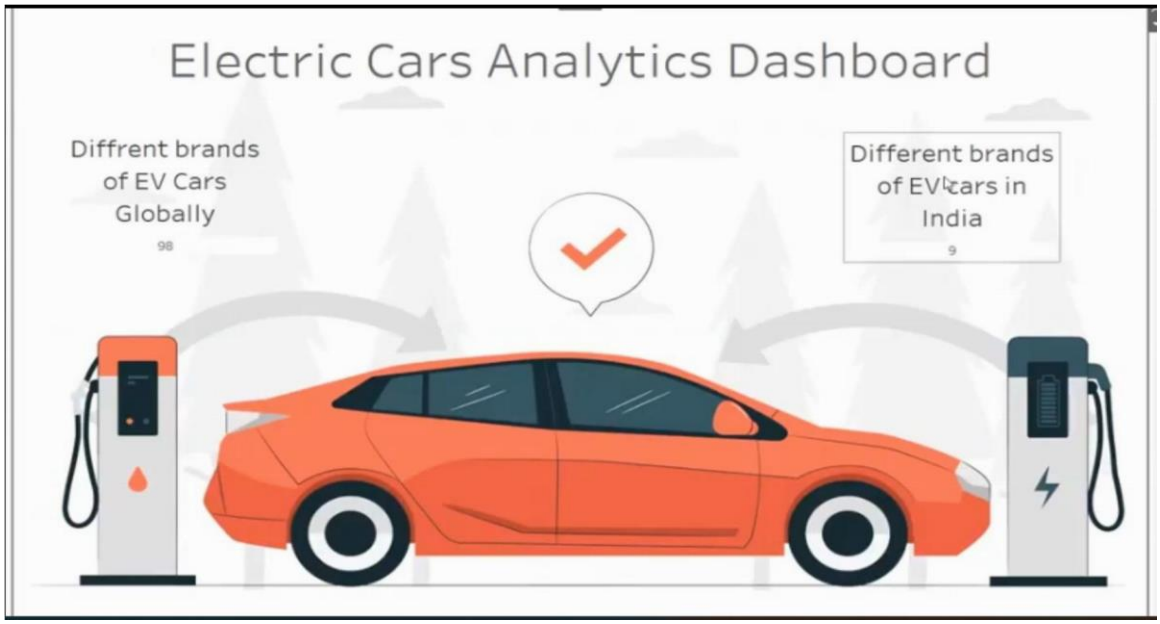
7. Data Visualization

Several charts were created in Tableau to analyze EV brands, models, charging stations, and price ranges.



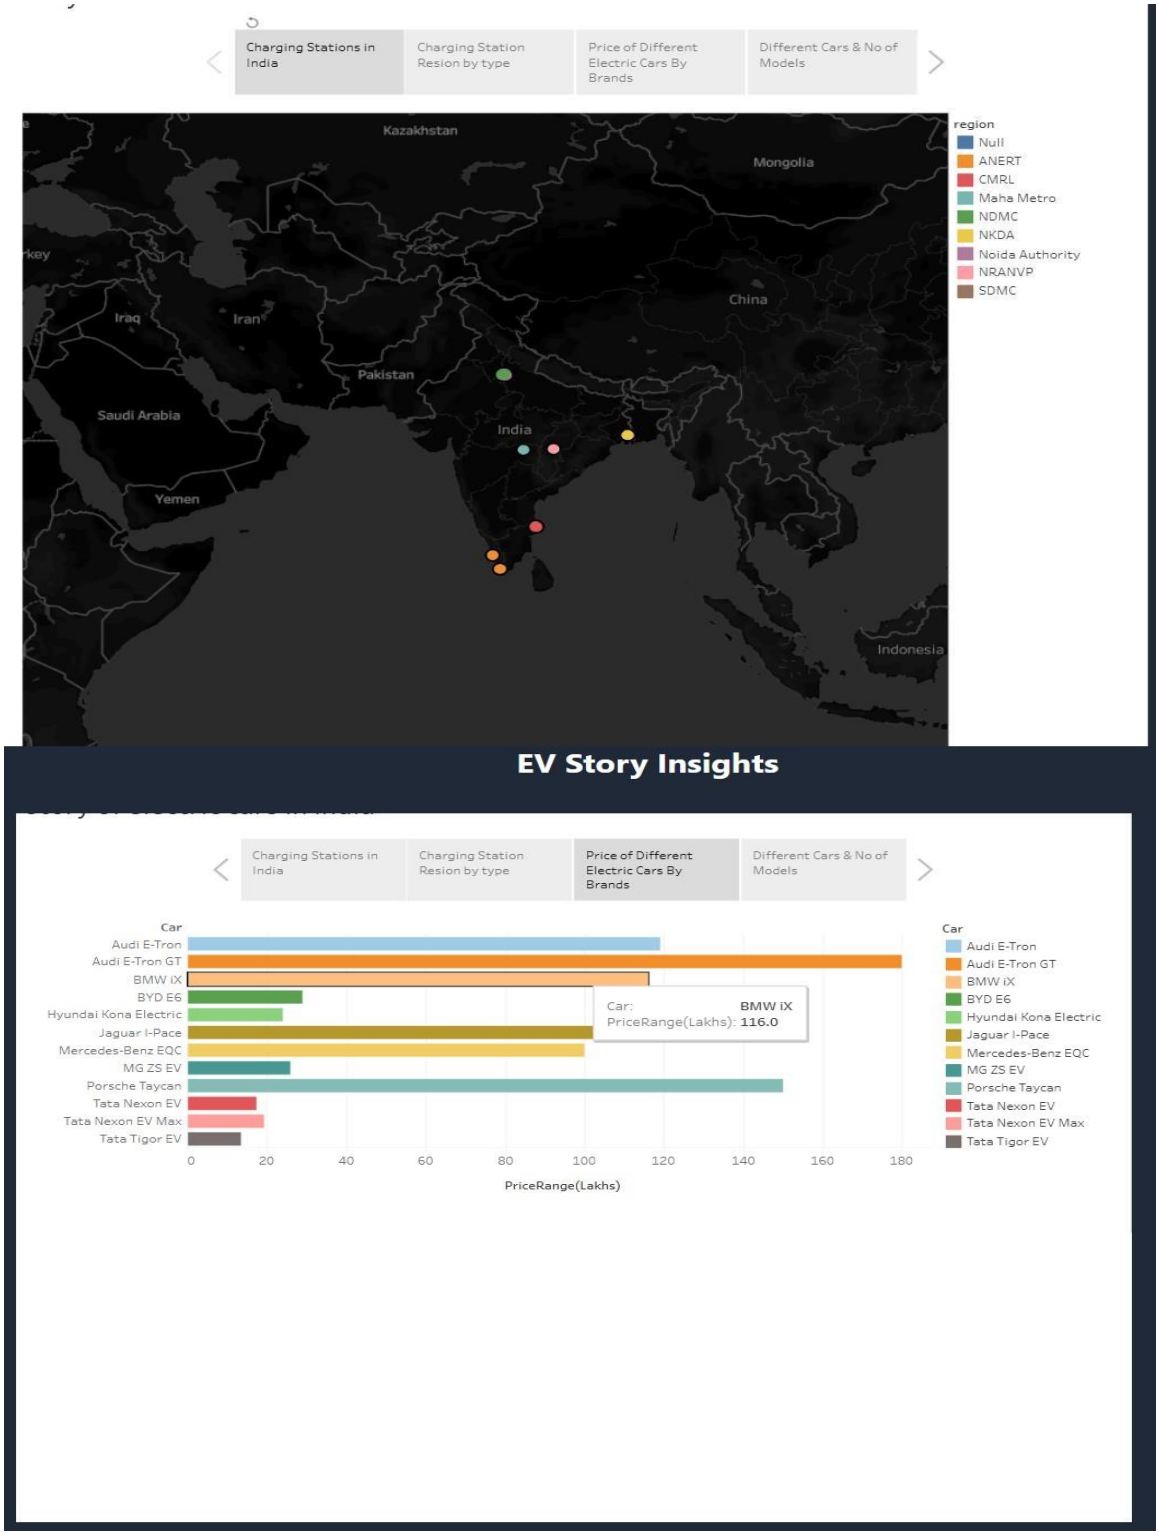
8. Dashboard

The dashboard combines multiple visualizations into one interface allowing users to explore EV insights interactively.



9. Story

A Tableau story presents insights step-by-step including charging stations, EV price comparison, and model availability.



10. Web Integration Using Flask

The Tableau dashboard and story are embedded into a Flask web application using HTML and Python so users can view visualizations through a web browser.

11. Conclusion

This project demonstrates how EV data can be visualized using Tableau and integrated into a Flask web interface to provide meaningful insights about Electric Vehicles.
